Vladyslav

• Middle NodeJS Developer • 4 Years Experience • Intermediate English Level

Professional Summary

Middle JavaScript/TypeScript developer with a strong backend focus, with a proven track record of delivering top-notch applications, I bring a wealth of expertise in building high-performance APIs, optimizing server-side code, and leveraging the latest technologies. Experienced with Node.js, NestJS, Express as well as modern frontend React framework.

Tech Skills

Nest.js | PostgreSQL | TypeScript | MongoDB | ExpressJs

Prisma | BullMQ | Node.js | Docker | JWT

Git | Redis

Secondary Skills

React | git | Websocket | Gitlab CI | Stripe(payment) | HTML & CSS | Vite | TailwindCSS

Key Achievements

Proficiency in Software Development

Developed RESTful APIs, implemented authentication systems, and optimized database queries for enhanced performance. Working independently, I provided tailored Node.js solutions for clients

across different industries. I developed custom APIs, implemented data processing pipelines, and ensured high-performance standards were met. Implemented Apple/Google wallet passes. Implemented and integrated payment solutions using Stripe and PayTabs APIs.

Technical Guidance and Mentorship

Conducted code reviews with a focus on readability, maintainability, and performance. Assisted teammates with resolving technical issues and shared practical solutions to help improve day-to-day development efficiency.

Last Projects Engaged

Under NDA

This project focuses on diagnosing diseases in children and parents.

Technologies

NodeJS, TypeScript, Javascript, AdminJS, GetStream IO, Bull, CustomerIO, Prisma, PostgreSQL, AWS S3

Features

- Developed an admin panel built with AdminJS and custom React-based pages.
- Integrated real-time chat using GetStream.io.
- Implemented Customer.io for behavior-based email automation.
- Added multiple notification workflows using Bull for background processing.

Under NDA

Shopify app

Technologies

NodeJS, NestJS, Javascript, TypeScript, MongoDB, Prisma, Shopify, GraphQL, AWS Queues

Features

- Had an experience working with shopify, implemented discounts, working with products/orders/bulk operations and with GraphQL.
- Added various statistics using MongoDB aggregation.

Under NDA

B2C platform for generating images, ordering and delivering the physical pictures to the end-customer.

Technologies

NodeJS, TypeScript, Javascript, NestJS, StabilityAI, Stripe, Printful, Prisma, PostgreSQL

Features

- Implemented image generation with StabilityAI api.
- Had an experience working with Printful

- Implemented Stripe api logic for one time payment

NPA Delivery: Node.js

Provides various educational programs that help to get up-to-date skills, achieve professional goals, and increase value in the global tech market.

Technologies

Nest.js, React, MongoDB, Redis, Socket.io

Features

- Implemented review skill pages (NestJS, React)

Under NDA

Offline/online education

Technologies

JavaScript, TypeScript, NestJS, NodeJS, Postgres, TypeORM, Redis, Bull, Swagger, SendBird (out of the box Chat solution), AWS S3, GCP Cloud Storage

Features

- Real-time chat and messaging system powered by the Sendbird API.

Under NDA

School CRM

Technologies

NestJS, NodeJS, Javascript, TypeScript, Prisma, PostgreSQL, Passkit-Generator, AdminJS

Features

- Implemented Apple Wallet and Google Wallet pass generation.

Project Under NDA

Develop booking application

Technologies

NodeJS, NestJS, Javascript, TypeScript, PostgreSQL, Prisma, Brevo, PayTabs,

Features

- While working on the project, I followed clean code principles and a Domain-Driven Design (DDD) approach.
- Integrated the PayTabs payment gateway to enable secure online payment processing.
